Junior Web Developer

Profile

Student web developer studying Web Development and Game Development at IEK Delta 360. I have completed the web design part of my studies and I am continuing with the game development part this year. I enjoy building simple, organized and useful websites with HTML, CSS and JavaScript.

Education

IEK Delta 360

Web Development / Game Development

Completed the web design part of the studies. Continuing with the game development part this year.

Angular Seminar

September 2026 - One month seminar

Learned Angular basics and practiced component-based frontend development.

Technical Skills

HTML	CSS	JavaScript
React basics	Angular basics	PHP
MySQL	Python basics	C basics
C++ basics	Responsive Design	Web Design

Project Experience

Portfolio and Study Projects

HTML, CSS, JavaScript, PHP, MySQL

Built web projects such as storefront pages, product catalogs, dashboards, filters, contact pages and database-backed websites. These projects helped me practice layout, styling, frontend logic and connecting pages with data.

Strengths

- Good understanding of HTML structure and CSS styling.
- Comfortable creating simple JavaScript modules and interactive pages.
- Interested in frontend development, UI design and game development.
- Motivated to keep learning and improve through real projects.

Languages

Greek: Native or fluent

English: Working knowledge
